

QA / QC Engineer, Newmarket CB8, Six Month Contract - £NEG

A well-established manufacturer based in Newmarket with a c£12m turnover, is seeking a multi-skilled QA/QC Engineer to support their ISO9001 accredited Quality function.

Reporting to the Quality Manager, you will be a self-starter with a minimum of five years experience in a QA/QC role, preferably within a high-volume, regulated manufacturing environment involving metal forming and processing.

A broad knowledge and practical experience of the responsibilities and tasks undertaken in QA, QC and Inspection is essential for the role.

With the ability to make an immediate impact, you will be undertaking a broad range of tasks ranging from maintenance of the QMS to metrology and internal auditing. This role will suit someone who enjoys variety and working in a busy team.

Key abilities / requirements of the role:

- Non-abrasive personality
- Versatile
- Practical
- Attention to detail
- Familiarity with accredited QMS
- Conduct patrol and goods-in inspection
- Conduct internal audits and implement corrective actions
- Help generate, policies and procedures
- Maintain QMS documentation
- Support data collection for management reporting and planning
- Support CAPA
- Liaise with suppliers on quality matters

This is a great opportunity where you will support the Quality function and work within a passionate, fun and innovative organisation that continually strives to maintain the respect and trust of their Customers.
